**UX Designer & Developer :** Cette annonce montre parfaitement un poste que je souhaiterais prendre une fois mes diplômes obtenus. Il permet d'exprimer ma double compétence en ingénierie et en commerce. Pour y postuler, on remarque bien l'utilité du diplôme de l'ITEEM, pour comprendre et développer le code, mais aussi d'un diplôme de la SKEMA Business School, pour exploiter les outils marketing et communiquer avec les équipes. Le secteur d'activité de l'entreprise (Banques) m'intéresse aussi, car c'est dans ce même domaine que j'ai réalisé mon stage à l'étranger. De plus, j'ai tenu à chercher une offre d'emploi d'un pays étranger, car mon objectif est de travailler à l'étranger.

Overview

Citi's technology team is growing at lightning speed, and we're looking for talented technologists to help build the future of global banking. Our teams are creating innovations used across the globe – we're changing the way people bank and how the world does business. Citi's technology team supports business operations in 100+ countries, across multiple lines of business spanning both Institutional and retail businesses. The group works to optimize the IT environment by standardizing production platforms, reducing complexity, and introducing innovative solutions that provide new business capabilities, reduce total cost of ownership, and create a competitive advantage for Citi. Join an environment with a laser focus on growth and progress, and take your career to the next level through the power of Citi's unmatched globality and vast expertise.

Success Profile

As the world's most global bank, Citi gives you the tools to be a trailblazer. We're not just building technology, we're building the future of banking. With thousands of employees located around the globe, we are an international team encompassing a broad range of teams, roles, and cultures, and we invite you to come and join us!

Responsibilities

- Prototypes, wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas
- Detailed user flows, wireframes, and visual design mockups to effectively conceptualize and communicate detailed interaction behaviors
- Ideation sessions
- 7+ years in the UX field with an emphasis on interaction design for web and mobile apps
- Proven UI experience with a strong design portfolio
- Previous UX/UI team management experience
- Solid experience in creating wireframes, storyboards, user flows, process flows and site maps
- Proficiency in Photoshop, Illustrator, OmniGraffle, or other visual design and wire-framing tools
- Experience working in an Agile/Scrum development process
- Proficiency in HTML, CSS, and JavaScript for rapid prototyping.
- Ability to present designs and sell solutions to various stakeholders.
- Ability to solve problems creatively and effectively
- Up-to-date with the latest UI trends, techniques, and technologies
- Ability to collaborate with front end developers and engineers
- Knowledge of wireframe tools (e.g. Wireframe.cc and InVision)
- Team spirit; strong communication skills to collaborate with various stakeholders
- Partner with multiple management teams to ensure appropriate integration of functions to meet goals as well as identify and define necessary system enhancements to deploy new products and process improvements
- Resolve variety of high impact problems/projects through in-depth evaluation of complex business processes, system processes, and industry standards
- Provide expertise in area and advanced knowledge of applications programming and ensure application design adheres to the overall architecture blueprint
- Utilize advanced knowledge of system flow and develop standards for coding, testing, debugging, and implementation
- Develop comprehensive knowledge of how areas of business, such as architecture and infrastructure, integrate to accomplish business goals
- Provide in-depth analysis with interpretive thinking to define issues and develop innovative solutions
- Serve as advisor or coach to mid-level developers and analysts, allocating work as necessary
- Appropriately assess risk when business decisions are made, demonstrating particular consideration for the firm's reputation and safeguarding Citigroup, its clients and assets, by driving compliance with applicable laws, rules and regulations, adhering to Policy, applying sound ethical judgment regarding personal behavior, conduct and business practices, and escalating, managing and reporting control issues with transparency.
